

# Erred Timecard Genie

**Erred Timecard:** displays employees who did not select their appointment for every shift or employees whose timecard have an "error".

The most common occurrence of an error would be the employee not transferring correctly or the supervisor selecting the wrong appointment for a person. The other type of error is extremely rare -- could result if there had been import difficulties and the appointment loaded to Kronos but not to the Multiple Job/Application Table (MJAT).
